If you loan your money to the government you do two things-you give your country credit and give the gavernment room in the workshop to get its job com-

Under the head "Things Noteworthy" Miss Consuelo Vanderbilt of New the Cincinnati Commercial Tribune says York, has been commandeered for the 'McAdoo is cutting off all the railroads' special lawyers, lobbyists and other pensioners and useless appendages that the public has been sustaining by means of high freight rates." and little, never forget. They will never forgive Secretary Daniels for keeping the navy sober. How the brewers and sion saloon interests would have been tickled had a convoy of our boys to France been sunk by the Kaiser's submarines, while they would make long and sanctimonions faces and cry, "grape juice" statesman-ship—see what it does to make weaklings of the navy lads.

The Ohio State Journal, Republican, though not of the peanut variety of the dear old Observer school, makes this activities, has been taken to Columsuggestion: "Well, our prominent critics of the administration appear to have failed to make a case against Secretary Daniels and now Secretary Baker seems to have established pretty clearly that they didn't know what they were talking about when they set out to prove his hopeless ineptitude, and we would suggest that they start in next on Secretary Redfield, who has side whiskers anyway, and thus naturally wouldn't challenge much popular sympathy right at first.

THE UNITED STATES FOOD

ADMINISTRATION SAYS: Food saving is in its essence the dally individual service of all the people. Every group can substitute, and even the great majority of thrifty people can save a little -and the more luxurious elements of the population can, by reduction to simple living, save much. This means no more than that we should eat plenty, but wisely and without waste.

Food Will Win the War

LARGE part of the world is coming to the position that Belgium is in ; coming to the stage where the pri-

in life is enough food to keep alive. Food has now

taken a dominant position in the war. The American reople must prepare themselves to sacrifice far more than was at first thought neces-

The cold facts are: France, Italy and England have just enough food to keep them going ten or twelve weeks. When America's food shipments stopthe allied nations begin consuming into this siender store and begin a swift march into actual famine conditions-which would mean defeat in short order.

Europe then must live on America's surplus. Your saving increases our available stocks just that much and actually feeds some person in the countries with which we are associated in our war against the Central Powers. Our surplus wheat has already

been shipped to the allies. U. S. FOOD ADMINISTRATION

Catarrhal Deafness Cannot Be Cured Catarrhal Deafness Cannot Be Cared by local applications, as they cannot reach the diseased portion of the car. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an indamed condition of the mucous links of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed. Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Half's Catarrh Medicine sets thrusten.
